

Regius Blue

- Global coverage
- No co-insurance applies for Latin America
- United HealthCare Medical Network

This medical insurance gives access the best health care nationally and internationally, and is unique in providing a differentiated deductible so you can get greater coverage. That sounds great, right?

With the Regius Blue Plan we protect you in the country and abroad, with a maximum annual renewable coverage of US\$1,000,000. Ideal for your individually or for the entire family. This is a favorite of companies, as an incentive to their collaborators.

Life must be lived in peace, so get your insurance and enjoy the multiple benefits it offers.

WHY IT IS IMPORTANT TO PURCHASE MEDICAL EXPENSE INSURANCE?

The most important reason is that the insurance company covers any medical expenses the policyholder may face due to illness, accident or simply a visit to the doctor. This is one of the benefits a user will enjoy from paying an insurance policy premium, either with a lifetime contract or with annual renewals.

Additionally, an insurance policy is an investment, capable of safeguarding the finances of users and their families in face of high private health care costs. Having a good health insurance is fundamental since it supports the services provided by the C.C.S.S.

- There is no need to sign up on a long waiting list to receive services at a health care center. Your consultation is immediate. Assistance in the emergency room at private hospitals is much faster.
- More than 852 medical specialists and 240 medical service providers, including pharmacies, clinical labs, imaging centers, and others will allow you to choose the professional you want depending on your health issue.
- In the event of hospitalization, you may have a single room, with greater comfort, and all medical services needed.

- Diagnostic test results are readily available when needed.
- Access to a Medical Cluster will broaden the choice of health care professionals, so you can make your appointments around your daily activities, in a very quick and timely manner, with the best and highest quality levels.
- Thanks to the assistance provided by our insurance, you can receive the most innovative treatments, numerous therapeutic options and state-of-the-art technology, all under supervision of the best professionals.
